

MPCConverter Ver 1.3.0.0

Version 1.3 incorporates a correction to correct the problem of the second pair of a drawn pair after the last pair entitled to Master Points, receiving six master points to which they are not entitled.

To install the program :-

1. Delete any installed copy of MPCConverter by using "Settings" -> "Apps" -> "Installed apps" then scroll down the list to MPCConverter and click the 3 dots followed by uninstall.
2. Delete the Icon on the desktop if windows uninstall has not removed it.
2. Unpack the ZIP directory and in the unpacked directory double-click setup.exe and allow the program to install when queried by the Windows Operating system.

If you have any problems you can email me at MG-Online@outlook.com.
